

Donovan Heynen | Frontend Web Developer

Chicago, IL · heynen.donovan@gmail.com · donovanheynen.com · linkedin.com/in/donovanheynen/

SUMMARY

Frontend-focused full-stack developer with a B.S. in Computer Science and 2 years of software engineering experience at Stellantis. Now building and deploying React applications for small businesses, including 4 live client projects and a shared backend email infrastructure using Cloudflare Workers. Owns the full web development lifecycle — from UI/UX design in Figma through deployment, SEO, and ongoing client support.

EDUCATION & CERTIFICATION

B.S. Computer Science · Grand Valley State University	Dec 2022
Minors in Computer Engineering & Mathematics	
Front-End Developer Certification · Meta (Coursera)	Jan 2025
Professional React Developer Certification · Scrimba (Coursera)	May 2025

EXPERIENCE

Freelance Web Developer · Self-Employed	May 2025 – Present
- Built and deployed 4 production React applications for service-based businesses in healthcare, real estate, and local services, each customized for client branding, SEO, and lead generation. - Architected a multi-tenant transactional email system using Cloudflare Workers, handling form submissions across all client sites via a centralized, scalable backend (Resend API + server rendered React email templates). - Own the full development lifecycle on every project: client discovery, UI/UX design in Figma, frontend architecture, deployment (Cloudflare Pages), SEO setup, and post-launch iteration. - Translated non-technical client requirements into production-ready applications, managing timelines, revisions, and ongoing support	
Software Engineer (Automotive) · Stellantis FCA	May 2022 – Nov. 2024
<i>Hybrid · Auburn Hills, MI</i>	
- Automated plant model engineering processes using MATLAB and Simulink, cutting manual workload and error rates by over 50% across the team. - Worked in an Agile global team, managed CI/CD pipeline debugging and deployment for high-priority HIL/SIL project builds, improving platform stability and release cadence for vehicle prototype systems. - Designed logic and electrical signal networks for vehicle prototype models, enabling virtual simulation testing before physical production.	

TECHNICAL SKILLS

Frontend	React.js, JavaScript (ES6+), HTML5, CSS3, Responsive Design, UI/UX, Figma
Backend	Node.js, Express.js, MongoDB, RESTful API, JWT Authentication
DevOps	Git, Cloudflare Pages & Workers, Render, MongoDB Atlas, NPM, Vite, CI/CD
Other	Python, C, MATLAB, Simulink, Agile/Scrum, SEO

PROJECTS · Additional projects available at donovanheynen.com/portfolio

Schedule System · github.com/heynendo/scheduling-tool · Jan 2026

Full-stack MERN scheduling platform designed to automate appointment booking workflows for service-based businesses. Implements role-based authentication, real-time availability tracking, and conflict resolution logic to prevent overlapping bookings across multiple users and schedules.

Email Server (Cloudflare Worker) · github.com/heynendo/emailserver-resend · Oct 2025

Multi-tenant transactional email backend powering 5 production websites. Built with Cloudflare Workers and Resend, implementing origin-based routing, per-client validation, and server-side React email template rendering. Designed so new clients can be added via configuration and template-only setup, eliminating backend changes per integration.

XCL Property Management · xclmgt.com · Nov 2025

Commercial property listing website for a real estate company in Orland Park, IL, designed to streamline discovery of available office spaces and improve tenant inquiry flow. Implements structured property listings, intuitive navigation, and contact-driven conversion paths for prospective tenants.

Rebie's Bakery · rebies-bakery.com · June 2025

Custom React website for a home-based bakery business, built to establish a professional online presence and improve local discoverability. Includes SEO-optimized structure, product gallery, browsable menu, and inquiry-based ordering flow designed to convert organic traffic into customer leads.
